

# Battery Connection Panels

Terrasmart Battery Connection Panels combine the outputs of several storage battery banks together before the inverter(s). Each input and output is fused. Load break or non-load break disconnect switch(es) as well as circuit breakers are among available options. Terrasmart Battery Connection Panels are rated up to 1500 VDC.

## Product features

- 2 to 16 input circuits (larger custom solutions available)
- 72/90C input/output terminals
- Touch-safe fuse holders
- Cover doors with poured-in-place seamless gaskets
- NEMA-3R rated enclosures

## Additional options

- Load break / Non-load break disconnect switch(es)
- Circuit breakers
- Compression lugs / Dual output lugs
- Input monitoring
- Floating / Bi-polar configurations
- NEMA-4 & 4X rated enclosures
