

Your Foundation for Solar Success

Every project presents its own challenges, selecting the right foundation type is crucial for completing projects on time and within budget. It's essential to choose a partner with an unbiased, fact-based approach to foundation selection, backed by a decade of experience installing in the field.

Driven Piles

- Ideal for soft soils with little refusal
- Cost-effective option
- Easy to install

Ground Screws

- Ideal for sites with refusal or frost heave
- Minimizes embedment depth
- Faster and predictable installation

Ballast

- Ideal for sites where you cannot penetrate the ground like landfills or brownfields
- Pre-cast and pre-assembled for installation speed

The Terrasmart Difference

- 1 Over a decade of experience installing foundations in some of the toughest conditions
- 2 Leaders in installation speed and quality
- 3 Over 2 million ground screws installed
- 4 A fleet of proprietary equipment
- 5 180+ person expert field team
