

## 10 Questions to ask when choosing your foundation partner

Deploying the foundation that suits your project and working with an experienced partner must go hand-in-hand to make sure you can unlock project value, manage project costs, and deliver your projects on schedule.

Here are ten key questions that you should ask when choosing the right vendor:

1

Do you have full spectrum solar experience that will give me confidence that you can understand my project needs and drivers, end-to-end?

2

Do you have hands-on experience installing different foundation types?

3

How much experience do you have performing pull out tests and analyzing geotechnical reports?

4

What soil and weather conditions do I need to consider when selecting a foundation?

5

What is your process if you encounter refusal during installation?

6

Have you installed in this type of soil and/or weather before?

7

How do you advise your customers when there is a site where both piles and screws could be applicable?

8

How long does it take to install each of your foundation options?

9

What are the potential risks I should consider?

10

Which foundation would you recommend for my project?
